Notice of Primary Meetings. The Republican Voters of Cecil county are requested to assemble in Primary Meet-ings, at the places for holding such; Meet-ings, in the several Election Districts, on nigs, in the several Lection Districts, on Saturnary afternoon, September 2d, next, at 3 o'clock, and elect five delegates to meet in County Convention at Elkton, on the following TUESDAY, September 5th, to elect four or five Delegates to represent Ceeli county in the Republican State Convention, which will assemble in Baltimore, on TUES-

which will assemble in Baltimore, on TUES-DAY, 12th of September following, for the purpose of nominating candidates for Gov-ernor and other State officers.

And it is further requested, that at the Primary Meetings, the question of Select-ing candidates for county officers be dis-cussed, and the manner of that selection be definitely determined—whether it be by what is known as the "Crawford county" mode, or whether the old practice by mode, or whether the old practice by County Convention be adhered to, and that the Delegates selected by the several Pri-mary Meetings, be instructed to report the sense of the meetings to the County Convention, which shall be empowered to finally settle the question. By order of the UNION REPUBLICAN EXECUTIVE COMMITTEE OF CECIL COUNTY.

The Primary Meetings.

We would urge upon the Republican party the importance of a full attendance at the primary meetings this afternoon and a free and full discussion of carrying into practice the manner of making county nominations in future. It seems to be the drift of public sentiment, that the mode of selecting candidates would be improved if the more popular plan of voting for them at the primary meetings, instead of selecting delegates to perform that important trust, were adopted. Some who are shy of innovations, manifest a degree of nervousness in view of thrusting this duty directly on the people, where it inherently belongs; and while agreeing that the principle is the proper one in a Republican form of government, yet, contend that the present is not the proper time to inaugurate it. With those people the time will always be in the future. The present is as good a time, in our judgment, as can be selected, and if the mode is to be tried, it had better be attempted at once. It was decided two years ago, by the popular vote of the party, to make county nominations in future by a direct vote of the party in primary meetings; let the people reconsider the matter this afternoon, and instruct their delegates, who will meet at Elkton on Tuesday next, to choose State Convention delegates, in their final determination, so that the canvass may be organized speedily and pushed vigorously. The great need of the party at of fruit weekly at their cannery in Seaford. present, is the best ticket that can be formed, in point of fitness for the duties of the respective offices, moral standing and willingness to work in organizing and getting out to the election the entire Republican vote. A large per centage of that vote has been indifferent in previous years,

organization be allowed before the election.

The Republican party of Cecil county must "push things," as Grant said, this Fall, if they expect to effect anything. The party has been in the back ground too long, and it is high time they were taking the lead again, if the interests of the county are expected to revive; and the principles of economy, retrenchment and reform are ever again to be inaugurated, as in the past, under Union Republican rule. These important results will in no small degree depend upon the interest and thoroughness

mend, however, so deeply concerns the health, happiness and comfort of our American woman, that we make no apology for giving it our most emphatic approval and endorsement. The invention referred to is the great American Washer, which is claimed to be in every conceivable respect superior to any other "washer" extant. It is the smallest, most compact, most portable, most easily operated, and is not at all liable to get out of order. Its construction is so simple, that even a child can be successfully taught to operate in an incredible short space of time.

Some of the most prominent and desirable features in this "washer," which is an inducement in itself, are worth of an especial commendation. They are these: It is always ready for use: there is no adjusting; no screws to confuse and annoy, and no delay whatever in adapting it. Every. thing seems to have been done that ingenuity could suggest; and in our estimation, it is simply a practical, sensible and beautiful invention, and only requires to be seen to be appreciated, which cannot fail to please the taste of the most fastidious Philadelphia Weekly Press.

THE SIXTH ANNUAL MEETING OF THE TEACHERS' Association .- The Association met at the Eastern High School, Baltimore, on Wednesday last, at 10 o'clock, and was opened with prayer by Rev. J. Thomas Murray. There was some animated discussion, and three very able essays read .-Prof. Hollingshead read an essay, entitled, "What can Teachers do to make the Public School System Popular and Successful?" which was certainly something all the teachers in the State should read. Mr. Walker, of Pennsylvania, followed, showing that the teacher's example formed the minds of the children, to a great extent, and gave some good advice to parentswhich they should have been there to hear. Prof. Harrison's essay, showing the advantage of teaching children in their primary course. The "Science of Life," (Botany and Zoology,) was the ablest production of the kind I ever listened to. There were five teachers present from Cecil county-Mr. McClintock, V. II. Watts, Jacob C. Warner, Misses Biddle and Howard. I wonder where our teachers are? W.

The American Washer Saves Money,

We have testimonials without end, setting forth its numerous advantages over all others, and from hundreds who have thrown aside the unwieldy, unless machines, which have signally failed to accomplish the object pro-mised in prominent and loud sounding advertisements. It is operfect for washing as a wringer is for wringing. The price another paramount inducement to purchasers, has been placed so low that it is within the reach of every house keeper, and there is no article of domestic economy that will repay the small investment so soon.

\$5.50.

All that is select for this GREAT LABOR SAVER, is fair trial. We guarantee each machine to do its work perfectly.

BUT ECONDAT, EFFICIENCY, AND CLEAN CLOTHING SUEE.

In calling public attention to this little machine, a few
of the invaluable qualities, (not possessed by any other
washing machine yet invented,) are here enumerated.

It is the smallest, most compact, most portable, most
simple in construction, most easily operated. A child
ten years old, with a few hours' practice, can thoroughly
comprehend and effectually use it. There is no adjusting,
no serves to annow, no dalsy in salapting! It is a shways
reedy for use? It is a perfect little wonder? It is a
ministure giant, doing more workand of a better quality,
than the most claborate and costly. One-half of the laker
is fully saved by its use, and the others will last onehalf longer than by the old plan of the rub board. It
will wash the targest blanket. Three shiftes that time,
weshing thoroughly! In a word, the addution of any
fabric, from a qualit to a Lace Curtain, or Cambrie Handker-bief, are equally within the capacity of this LITTLE

MEM! It can be fastened to any tub and taken off at

This Company has had a successful experience of more than nineteen years, and by prodent management has become one of the strongest Companies in this country. CASH DIVIDENDS. will.

No matter how deep-rooted a prejudice may exist against Washing Machines, the moment this little machine is seen to perform its wonders, all doubts of its cleaning efficacy and utility are bandshed, and the doubter and defractor at once become the fast friends of the machine.

We have testimonials without end, setting forth its This Company is STRUCTLY MUTUAL, AND DIVIDE ALL THE SURPLUS AMONG THE POLICY-HOLDERS

on the Contribution Plan.
Only Two Full Payments are required on any Policy
as the Cash Dividends may be used Annually thereafter as the Useh Dividends may be used Annually thereafter, to reduce future payments.

As your Clock Dividends increase, the future payments which you make will gradually decrease.

Dividends may be added to the Policy, and are accer for fatted by the non-payment of Premissas, but at any time may be converted into cash.

One Annual Premium will continue the Policy in force 2 years and 3 days. Suppose the assured has paid one annual premium, and from illness, absence, reverses in business, should fall to pay the second, fits Policy wotth Nor in pokratras, but continue in force 2 year and 3 days from the date of the Policy, or one year and three days after failure to pay the second annual premium.

year and three days after failure to pay the second annual premium.

Each premium, from the very first, secures a paid up Delicy without any further payment being made; and the secured need not pay two premiums to secure it, as is required in other companies.
